Training Course Catalog

Discover why leading organizations rely on our comprehensive training programs to increase workplace safety and to ensure compliance with OSHA, CalOSHA, CalEPA, and DOT regulations.

- Hazardous Materials Management
- Hazardous Waste Operations
- 24 & 40 Hour HAZWOPER Certification
- Chemical Hazards
- DOT Hazardous Materials Shipping
- Forklift Safety Certification
- Emergency HazMat response
- Confined Space Rescue
- Fall Protection Awareness
- Train-the-Trainer Programs
- Certification & Refresher Courses

Businesses - large and small - need to know how to meet the latest OSHA regulations to protect workers from hazards, and avoid the growing number of inspections, Workers Compensation claims, and workplace-related lawsuits.

ABOUT OUR TRAINING PROGRAMS

The Industrial Safety & Hazmat Training Group provides professional employee training in HAZWOPER and HAZMAT certification courses, as well as general safety training for industry and government. We have a proven track record of providing effective training programs designed specifically for individual client needs.

TRAINING PROGRAM INFORMATION

Training Programs: Courses are typically led by a single instructor using a lecture and discussion format. Some classes provide participants with work-through case studies or reference material. Courses are continuously updated and revised for technical accuracy and to provide the most meaningful, practical and useful content.

A **Basic** or **Certification** course covers fundamental principles and skills.

This level is for participants with limited or no exposure to the subjects. A comprehensive examination is given, and a formal Certificate of Training is awarded upon successful completion of the course.

An **Advanced** or **Re-Certification** course focuses on the development of in-depth knowledge, a variety of skills, or a broader range of applications. This level is for participants with significant knowledge. A comprehensive examination is given and Certificate of Training is awarded upon successful completion of the course.

Registration Fees: Fees are listed with each class. Registration fees include cost of class materials. Fees and schedules are subject to change without notice. The full class fee is payable at time of registration or on the first day of class, unless other arrangements have been made.

Satisfaction Guaranteed! The Safety Hazmat Training Group prides itself on the high quality of our programs and guarantees the quality of our training courses. If you are not satisfied with one of our courses please call 408-242-2418 or email us at: rpwasley@safetyhazmattraining.com

ON-SITE TRAINING SOLUTIONS

Looking for a convenient cost-effective training solution? We can provide an on-site training program customized to address your organization's goals and schedule.

On-site training allows you to:

- ▶ Train employees together at the most convenient time and place
- ▶ Maximize a limited budget by eliminating travel expenses
- ▶ Demonstrate your commitment to staff safety and development
- ▶ Give staff the skills and knowledge to meet workplace challenges and perform at their peak.

For more information on available classes for your specific needs, call 408-242-2418 or email us at: robert@safetyhazmattraining.com

HAZMAT CERTIFICATE & RECERTIFICATION PROGRAMS

HAZARDOUS WASTE OPERATIONS

These comprehensive programs are designed to cover what supervisors and workers need to know to work safely with chemicals and hazardous materials, as well as OSHA regulations and procedures. A thorough examination will be conducted, and a Certificate of Training is awarded upon successful completion of each course.

Unless otherwise stated all expenses (materials, manuals, certificates, and travel within the San Francisco Bay Area) are included in the cost. We are available for travel to any location. Just call us at 408-242-2418 for a free estimate or proposal.

24-Hour Hazardous Waste Operations Certification

Course Fee: \$425 each

Duration: 24 hours

Course Overview: This course fulfills requirements for certification under 29 CFR, 1910.120(e), and other applicable state regulations for certification to the 24-hour Occasional Site Worker level. This course is designed for employees who work on site only occasionally for specific limited tasks, and/or who are unlikely to be exposed over the permissible exposure standards. Training at this level will enable the worker to recognize hazardous materials, elect and use proper protective equipment, use basic control, containment, and confinement measures, use basic decontamination procedures, and follow standard operating and incident procedures. This course does not include air monitoring or use of respirators. Annual re-certification is required.

40-Hour Hazardous Waste Operations Certification

Course Fee: \$560 each

Duration : 40 hours

Course Overview: This course fulfills requirements for workers required to have initial certification if they are involved in hazardous waste operations, including the removal or handling of underground tanks and/or piping, contaminated soil and/or groundwater, emergency response operations, construction work in which hazardous materials may be present, or any location where hazardous wastes are treated, stored, or disposed. The course includes an overview of relevant environmental regulations, a survey of physical and chemical site hazards, toxicology, PPE including respirator application and use, air monitoring, hazard control, confined space, and other related topics. Our certificate course exceeds OSHA requirements for 29 CFR 1019.120(e) / CCR Title 8, 5192. Annual re-certification is required.

Hazardous Waste Operations Annual Re-Certification

Course Fee: \$140 each

Duration : 8 hours

Prerequisite: OSHA 40 hour or 24 hour HAZWOPER training

Course Overview: This course meets the requirements in OSHA 29 CFR 1910.120 for eight hours of annual refresher training, with a review of topics covered during initial HAZWOPER training, previous year's experience, along with updates in OSHA regulations and procedures, hazardous chemicals, safety hazards, air monitoring, medical surveillance, site control, decontamination, and PPE. If you are tired of repeating the same old 8-hou refresher each year, this is the class for you. Our instructors tailor each presentation to the needs of the students. A comprehensive examination is conducted, and a Certificate of Training is awarded upon successful completion of the course.

Hazardous Waste Operations Supervisor Training

Course Fee: \$160 each

Duration : 8 hours

Course Overview: This full day presentation is designed for site supervisors and others who manage hazardous material site workers. This course will address the supervisor's role and responsibility for the safety and well being of workers. Includes accident prevention, regulations, worker health, and safety programs. A comprehensive examination is given, and a Certificate of Training is awarded upon successful passing of the exam.

For more information or to register call us at 408-242-2418

TRAIN-THE-TRAINER PROGRAMS FOR INDUSTRY PROFESSIONALS

MATERIALS MANAGEMENT

These comprehensive programs are designed to cover what supervisors and workers need to know to work safely with chemicals and hazardous materials, as well as OSHA regulations and procedures. A thorough examination will be conducted, and a Certificate of Training is awarded upon successful completion of each course. Unless otherwise stated all expenses (materials, manuals, certificates, and travel within the San Francisco Bay Area) are included in the cost. We are available for travel to any location. Just call us at 408-242-2418 for a free estimate or proposal.

Hazardous Waste Management

Course Fee: \$160 each

Duration: 8 hours

Course Overview: This course covers what your employees need to know in order to work safely and properly with hazardous waste. Course includes overview of the environmental regulations RCRA, CERCLA and relevant amendments, Hazcom, safety procedures, PPE, spill prevention and response, storage and shipping requirements, and site inspections. A comprehensive examination is given and a Certificate of Training is awarded upon successful passing the exam.

Hazard Communication (HazCom)

Course Fee: \$35 each

Duration: 2 hours

Course Overview: This training session will ensure that your employees understand the potential for exposure and their liability and responsibility as it relates to your company's Hazard Communication Program. The course includes a comprehensive overview of the Standard, your written policies and procedures, material safety data sheets, your company's chemical labeling system, as well as how to recognize and protect themselves from hazardous materials and chemicals. Participants will receive materials and handouts needed to assist in subject retention. The session will consist of lecture, handouts, and video presentation.

Safe Chemical Handling & Storage

Course Fee: \$100.00 each (group discounts available)

Duration: 4 hours

Course Overview: In compliance with OSHA's regulations, this course provides an overview of what employees need to know to work safely with hazardous chemicals. Topics covered include, Hazcom, PPE, handling procedures, spill prevention and response, along with other related topics. A comprehensive examination is given and a Certificate of Training is awarded upon successfully passing the exam.

DOT Hazardous Material/Waste Shipping & Transportation

Course Fee: \$160 each

Duration: 8 hours

Course Overview: This course is to introduce or refresh participants to DOT requirements and procedures regarding the shipping of hazardous materials and wastes. Providing an overview of 49 CFR 172-181 topics included are hazardous material classification, container labeling and marking, placards, shipping documentation, emergency communication, and spill response. Course is readily adjusted to transporter requirements as well. A comprehensive examination is given and a Certificate of Training is awarded upon successful passing of the exam. Required for initial training and must be renewed every 3 years.

CUSTOMIZED ON-SITE EMPLOYEE TRAINING

SAFETY TRAINING

Providing health and safety training helps you to ensure your employees are not injured or made ill by the work they do, and avoid the financial costs of accidents and occupational illness. The law requires employers to provide information and training to ensure the health and safety of employees.

Unless otherwise stated all expenses (materials, manuals, certificates, and travel within the San Francisco Bay Area) are included in the cost. We are available for travel to any location. Just call us at 408-242-2418 for a free estimate or proposal.

NOTE: Safety training and drills are done on-site only.

Workplace Supervisor Safety Certification

Course Fee: \$160 each

Duration: 8 hours

Course Overview: In order to protect company and employee interests, reduce costs, and contain safety risks, all supervisors should know their responsibilities under CalOSHA regulations. This full day course will include accident prevention and investigation, employer/employee rights and responsibilities, the role of CalOSHA, inspections, citations, and other related topics.

Confined Space Entry

Course Fee: \$100 each

Duration: 4 hours

Course Overview: This course includes a regulatory overview, explains differences between non-permit/permit-required confined spaces, and safety procedures. It is critical that anyone involved in confined space entry be aware of all potential hazards, entry permits, their tasks and legal responsibilities. Required for initial training.

Forklift Safety Certification

Course Fee: \$100 each

Duration: 4 hours

Course Overview: This Forklift Safety course is designed for all personnel who operate an industrial forklift or lift-type truck. Course teaches all aspects of required training, including safe driving practices, loading, equipment inspection, and regulatory overview. Required initial training and recertification needed minimum every 3 years.

Fall Protection Safety

Course Fee: \$100 each

Duration: 4 hours

Course Overview: General awareness course includes regulatory guidelines (Cal/OSHA CCR Title 8 §3299 Appendix C) along with training on identification, inspection, use and care of general fall protection equipment. The course also includes hands-on training with the contractors particular equipment that is currently in use. Instructor will utilize contractor-supplied equipment and provide demonstration, application and safe use of equipment.

Safety Training Modules

Course Fee: Call for course module prices

Duration: 2 or 4 hours

Course Overview: Various safety courses are available for Back Safety, Blood-borne Pathogens, Excavation Safety, Hearing Protection, Respiratory Protection, Fire Extinguisher, Driver Safety, and more.

For more information or to register call us at 408-242-2418

EMERGENCY RESPONSE TRAINING

EMERGENCY RESPONSE TRAINING

Providing health and safety training helps you to ensure your employees are not injured or made ill by the work they do, and avoid the financial costs of accidents and occupational illness. The law requires employers to provide information and training to ensure the health and safety of employees.

Unless otherwise stated all expenses (materials, manuals, certificates, and travel within the San Francisco Bay Area) are included in the cost. We are available for travel to any location. Just call us at 408-242-2418 for a free estimate or proposal.

NOTE: Emergency Response training and drills are done on-site only. Clients will need to provide their own equipment.

First Responder Awareness (OSHA)

Course Fee: \$100 each

Duration: 4 hours

Course Overview: The First Responder Awareness (FRA) course reviews hazard recognition and reporting, security zones, evacuation, and use of the DOT's Emergency Response Guidebook.

First Responder Operations (OSHA)

Course Fee: \$140 each

Duration: 8 hours

Course Overview: This comprehensive one day course includes all topics of the First Responder Awareness (FRA) course, but takes students further into techniques of defensive actions to limit the range of the release, reducing potential health risks to people, and/or damage to the environment/property. Includes hands-on practice drills.

Emergency Response Technician (ERT)

Course Fee: \$425 each

Duration: 24 hours (3 days)

Course Overview: This course is designed for all employees who respond to a hazardous materials emergency. Per OSHA guidelines, these people must receive training based on their level of activities at the incident. This particular course is designed for those who are likely to respond to a hazardous materials emergency for the purpose of protecting person, property, or the environment from the effects of the release. Course covers defensive and offensive techniques, PPE, safety and chemical hazards, action planning, notification, and hands-on drills.

Emergency Response Technician (ERT) Refresher

Course Fee: \$140 each

Duration: 8 hours

Course Overview: One day review of topics covered in the initial three day course. Includes practice with responder equipment, review of company's emergency action plans, and actual drills.

Incident Response Management Certification

Course Fee: \$160 each

Duration: 8 hours

Course Overview: This comprehensive one day course includes a regulatory overview and legal responsibility, safety programs, review of facility, local, and state emergency response plans. This course is designed to provide participants with an increased capability to assume the role of an Incident Commander during hazardous material response event; with specific emphasis on personnel safety and management of the HazMat scene. The students will become familiar with their company's emergency response plan.

OSHA Required Training Specific To Your Industry

CUSTOMIZED ON-SITE EMPLOYEE TRAINING

LABORATORY SAFETY TRAINING

Laboratories are the sites of many potential hazards. Providing health and safety training helps you to ensure your employees are not injured or made ill by the work they do, and avoid the financial costs of accidents and occupational illness. The law requires employers to provide information and training to ensure the health and safety of employees.

Unless otherwise stated all expenses (materials, manuals, certificates, and travel within the San Francisco Bay Area) are included in the cost. We are available for travel to any location. Just call us at 408-242-2418 for a free estimate or proposal.

NOTE: Safety training and drills are done on-site only.

Bio-Safety

Course Fee: Call for pricing

Duration: 8 hours

Course Overview: This is an introductory course on Biosafety that covers definitions of biological and bio-hazardous materials, risk groups, biosafety containment levels and controls, as well as other general biosafety principles and requirements. General Biosafety Training, is required for all personnel who work with potentially viable biological materials, including for example: microorganisms (of any risk level); cells or cell lines; tissue cultures; recombinant DNA, organisms, or viruses; animal blood, body fluids, or tissues; or animals.

Laser

Course Fee: Call for pricing

Duration: 8 hours

Course Overview: Anyone who works with or potentially exposed to lasers whose power exceeds the Maximum Permissible Exposure (MPE) level, such as Class 3b or Class 4 lasers and laser systems, need safety training. This training covers roles and responsibilities (including laser Safety Officer), basics of laser operation, laser accidents, laser biophysics, laser classification systems, control systems (including signage and labels), laser controlled areas, temporary laser controlled areas, and PPE.

Radiation

Course Fee: Call for pricing

Duration: 8 hours

Course Overview: All researchers working in a laboratory in which open sources of radioactive materials (i.e., does not meet sealed or plated source definition) must complete initial and refresher radiation safety training. Lab personnel are trained to understand and recognize workplace hazards, learn rules of the radiation safety program, and to teach how to respond and assist if a radiation incident occurs in the lab, as well as to ensure that all personnel are familiar with using radiation survey meters.

Safety Training Modules

Course Fee: Call for course module prices

Duration: 2 or 4 hours

Course Overview: Various safety courses are available for Back Safety, Blood-borne Pathogens, Excavation Safety, Hearing Protection, Respiratory Protection, Fire Extinguisher, Driver Safety, and more.
